- 1** P7: Open-source documentation: in search of user-driven, just-in-time writing 82%  
Erik Berglund , Michael Priestley  
Annual ACM Conference on Systems Documentation October 2001  
Iterative development models allow developers to respond quickly to changing user requirements, but place increasing demands on writers who must handle increasing amounts of change with ever-decreasing resources. In the software development world, one solution to this problem is open-source development: allowing the users to set requirements and priorities by actually contributing to the development of the software. This results in just-in-time software improvements that are explicitly user-driv ...
- 2** Supporting community and building social capital: Audience-specific online community design 80%  
Dorine C. Andrews  
Communications of the ACM April 2002  
Volume 45 Issue 4  
Not all people are easily drawn to the virtual community. Research indicates people of a certain age and lifestyle are indeed reluctant to interact online under any circumstances.
- 3** Session 6: When culture and style aren't about clothes: perceptions of task-technology "fit" in global virtual teams 80%  
Anne P. Massey , Yu-Ting Caisy Hung , Mitzi Montoya-Weiss , V. Ramesh  
Proceedings of the 2001 International ACM SIGGROUP Conference on Supporting Group Work - Volume 2001 September 2001

09/176,077

The rise of the virtual organization in response to global competition and advances in technology has led to the deployment of global virtual teams. Global virtual teams are increasingly commonplace when team members are geographically dispersed and as travel budgets are cut. A global virtual team can be described as a culturally diverse, geographically dispersed, and electronically communicating work group. Virtual teams and the technologies that support them promise the flexibility, responsive ...

- 4** It is possible to teach computer ethics via distance education! 77%

Jo Coldwell

Selected papers from the second Australian Institute conference on Computer ethics - Volume 1 November 2000

The Australian Computer Society (ACS) has mandated, through their core body of knowledge, that computer ethics and professional responsibility should be included in information technology study programmes. However, quite naturally, the ACS do not provide any direction as to how such content should be imparted to students. Many different models are used to good effect. In this paper I describe the framework in which computer ethics is taught in the Bachelor of Computing at Deakin University. This ...

- 5** IS '97: model curriculum and guidelines for undergraduate degree programs in information systems 77%

Gordon B. Davis , John T. Gorgone , J. Daniel Cougar , David L. Feinstein , Herbert E. Longenecker

ACM SIGMIS Database , Guidelines for undergraduate degree programs on Model curriculum and guidelines for undergraduate degree programs in information systems December 1997  
Volume 28 Issue 1

- 6** Communities and Organizations: Designing for improved social responsibility, user participation and content in on-line communities 77%

Sean Uberoi Kelly , Christopher Sung , Shelly Farnham

Proceedings of the SIGCHI conference on Human factors in computing systems: Changing our world, changing ourselves April 2002

Web sites face difficult challenges in supporting successful communities. In this paper we discuss 2 operating web sites, identically designed but with different and distinct audiences. These sites collect user data from site activity and feed it back to the user community in novel ways. The sites are highly active and growing, and have fostered socially conscious, easily navigable and comprehensible on-line communities with little cost and maintenance. The practice of user data collection and r ...

- 7** Session 6: The social web cockpit: support for virtual communities 77%

Wolfgang Gräther , Wolfgang Prinz

Proceedings of the 2001 International ACM SIGGROUP Conference on

Supporting Group Work - Volume 2001 September 2000

This paper describes the design and functionality of the Social Web Cockpit, an assistant that supports users while traversing the World Wide Web. The cockpit provides social awareness and supports collaboration, notification of interesting Web pages, collaborative construction of community knowledge, and the development of a community vocabulary. The cockpit aims at turning the World Wide Web from an interaction medium into a cooperation tool, for the active support and self-organization of vir ...
